## Quick Pitch® Float Systems

U.S. Patent Nos. 6,088,984; 6,155,015 and 6,568,140

### No. SSK-105 Standard Shower Kit

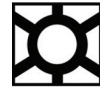

*Designed for easy shower floor installation*

This 3-in-1 Standard Shower Kit includes the following:

- 1 Each No. PPK-201 Pre-Pitch Standard Kit
- 1 Each No. QPK-101 Quick Pitch® Standard Kit
- 2 Each No. 543 Kirb-Perfect™ Shower Curb
- 1 Each No. PWP-106 Positive Weep Hole Protector™

**PRICE**

**\$79<sup>50</sup>**

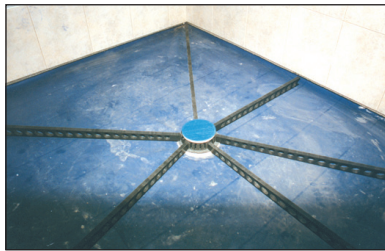

**MARK E**  
INDUSTRIES

For use where the drain is no further than 36" from any wall or curb. For larger areas, use the Pre-Pitch Extended Kit and Quick Pitch Extended Float Sticks.

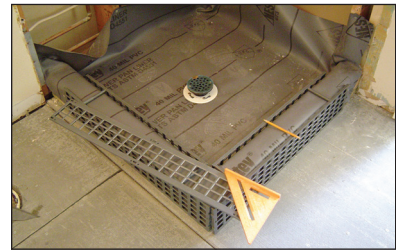

**Note:** See Catalog 126, Pages 100 and 101 for further details on these products.

No. PPK-201 Pre-Pitch Standard Kit

No. QPK-101 Quick Pitch® Standard Kit

No. 543 Kirb-Perfect™ Shower Curb

### Pre-Pitch™ System

U.S. Patent Nos. 6,088,984; 6,155,015 and 6,568,140

Pre-Pitch™ is a unique, stay in place screeding tool designed for use *underneath* shower pan liners. The first product to be installed, Pre-Pitch creates the proper sub floor pitch ( $\frac{1}{4}$ " per 12" run) needed to direct water flow towards the weep holes that are an integral part of shower floor drains. By having a pitch under the pan liner, water that passes through the mud bed is now directed to the weep holes instead of being trapped between the mud bed and the liner where many mold and mildew related issues originate. The plastic Pre-Pitch sticks have holes in their vertical web which helps to act as reinforcement and are easily cut with a hacksaw, PVC cutter or dry diamond blade. For wood subfloors, Pre-Pitch can be screwed or nailed in place. For concrete subfloors, use two sided tape. Subfloor must be level, sound and properly prepared prior to installing Pre-Pitch. Includes instructions, screws and double sided tape.

Install the kit

### No. PPK-201 Pre-Pitch Standard Kit

For standard shower areas with a centered drain, or custom shower areas where the drain is within 36" of each wall. For shower areas where the walls are more than 36" (but less than 72") from the floor drain, also use Pre-Pitch Extended Kit shown below. Sticks measure  $\frac{1}{8}$ " to  $\frac{7}{8}$ " taper x 36" long. Sold 6 per package.

**PRICE**

**\$18<sup>15</sup>**

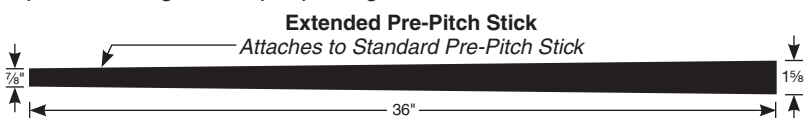

### No. PPK-202 Pre-Pitch Extended Kit

These Extended Sticks attach to the  $\frac{7}{8}$ " end of the Standard Pre-Pitch Sticks. They are for use in shower areas where the walls are more than 36" (but less than 72") from the floor drain. Sticks measure  $\frac{7}{8}$ " to  $1\frac{5}{8}$ " taper x 36" long. Sold 6 per package.

**PRICE**

**\$27<sup>70</sup>**

Fill with mud

# Quick Pitch Float® Systems

NPR-20

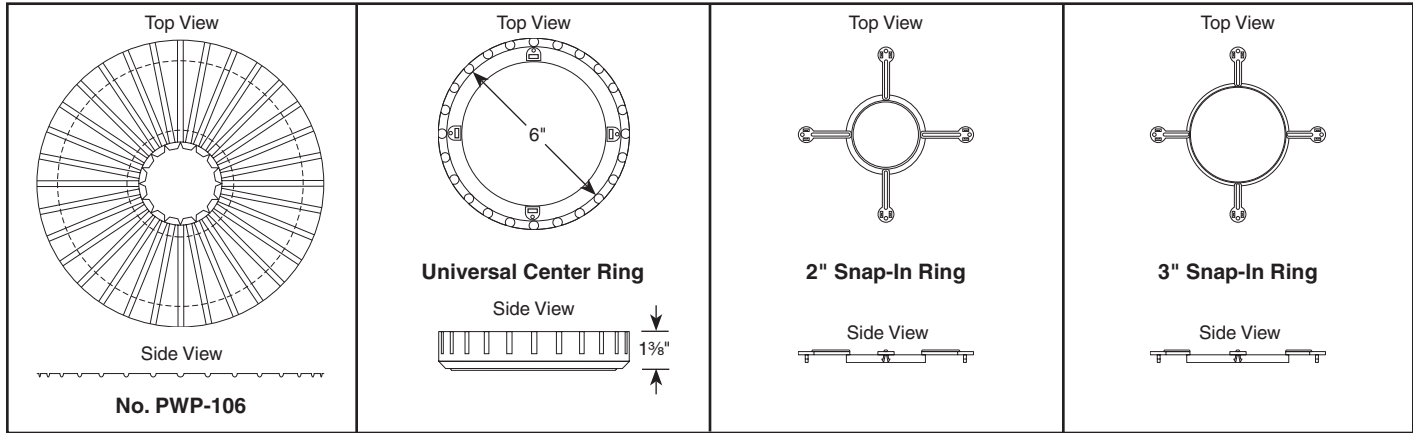

## No. QPUCR-108 Quick Pitch® Universal Center Ring with No. PWP-106 Positive Weep Hole Protector™

**PRICE**  
**\$21<sup>25</sup>**

The Universal Center Ring is designed for use with either 2" or 3" shower drains, square drain risers and most other speciality shower drains. It comes with a 2" and 3" threaded snap-in insert to match the threaded riser portion of the drain. The Universal Center Ring has 24 Standard Float Sticks attachment slots placed every 15°, a 6" upper inside diameter and is 1 3/8" high. It is recommended that

extra Standard Float Sticks (No. XFS-101-2) be used because the Center Ring which is included in the Quick Pitch Standard Kit is not needed when using the Universal Center Ring. A No. PWP-106 Positive Weep Hole Protector is also included.

**Note:** See Catalog 126, Page 101 for further details on the No. XFS-101-2.

No. QPUCR-108 Quick Pitch® Universal Center Ring

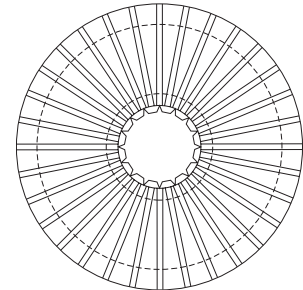

## No. PWP-106 Positive Weep Hole Protector™

This patented clear plastic drainage disk is for placement around a drain opening in a shower floor. Designed to be positioned between the floor pan and the mortar laid over the floor pan. The ridges of the Positive Weep Hole Protector allow for drainage of water to the weep holes in the drain receptor. Helps prevent water from sitting between the shower pan liner and mortar bed. The inner and outer diameter of the disk are perforated to allow for customization depending on shower drain size.

**PRICE**  
**\$5<sup>69</sup>**

U.S. Patent No. 5,022,430

Diameter	Size	
	With Perforations	Without Perforations
Outside	9 7/8"	8 3/8"
Inside	2 1/2"	3 7/8"

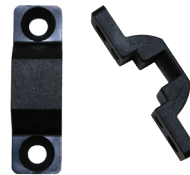

## No. QC-109 "Quick Clips" for Float Sticks

Quick Clips are designed to hold the Quick Pitch Standard and Extended Float Sticks in place for shower installations where the Center Ring is not required. These Clips can be used with the Schluter Kerdi Drain, Noble TS, Quick Drain Systems or any linear drain system. Quick Clips can be used with either a wood or concrete subfloor. Package includes 12 clips, 24 screws, and 12 double sided tape pieces.

**Note:** The Quick Pitch® Standard Float Sticks (No. XFS-101-2) is also recommended for this application.

**PRICE**  
**\$6<sup>59</sup>**

## No. 283 Handi-Kirb™ Shower Curb U.S. Patent Pending

The Handi-Kirb™ Shower Curb is a stay-in-place plastic form for roll-in, wheelchair accessible shower curbs where recessing the compartment floor is not possible or practical. Handi-Kirb has molded in dovetail connecting lugs to accommodate any size shower opening and can be used with either a liquid or sheet pan liner membrane. Handi-Kirb can be used in its complete profile to give an untiled height of 2 3/8". It can also be cut in two places along its length to give a low profile untiled height of 3/4". Handi-Kirb is easily cut with a hacksaw, PVC cutters or angle grinder. Can be used on concrete sub floors using 1 1/2" Tapcon® screws or wood sub floors using 1" wood screws. (Screws not included.) Supplied with installation instructions. Handi-Kirb is 8" wide x 30" long and 2 3/8" high.

**PRICE**  
**\$13<sup>20</sup>**
